

Sukup Manufacturing Company Case Study • Sheffield, IA

Genwall • 36,321 sq. ft.

- Architect: Berland + Cram
- General Contractor: Henkel Construction
- Installation completed on December 5, 2013

1. Construction begins on Sukup Manufacturing Co.

2. Genwall panels are extremely versatile and allow for windows to be cut anywhere.

3. Genwall panels maximize the length of the space along the south elevation.

4. Genwall panel cuts can be reused in between spaces for cost effectiveness.

5. Genwall hat channels are installed. Buildings can easily be re-skinned without disturbing the interior wall system.

6. After Genwall and windows have been installed, the building has a complete air barrier and is weathered in.
