A-Plank
Metal Battens

Constructed with minimum .080" aluminum, A-Plank Battens can be installed vertically or horizontally and are a complement to the building. A-Plank Batten's simple design allows for ease of detailing and installation to get it on the building quick and easy.

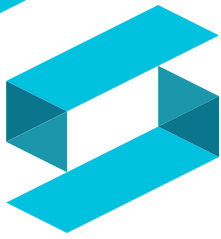

While simple in design, A-Plank choices are abundant - available in standard Kynar solid colors, powder coat, faux-woodgrain powder coat, and anodized finishes.

System Features

| | |
|-------------|--|
| System | Aluminum tube battens |
| Dimensions | 4", 6", or 8" x 1 3/4" x up to 16' long |
| Finishes | Solid Kynar, powder-coat, faux-woodgrain, anodized |
| Substrate | Plywood, heavy gauge metal studs, masonry |
| Maintenance | Minimal |

Batten extrusion can be installed vertically or horizontally to the substrate with appropriate fasteners. The corresponding batten piece then snaps together, with available end caps, to complete the batten assembly.
